Your answer

Working Experience

- ⦿ 0-1 years
- ◯ 1-5 years
- ◯ 5-10 years

Clear selection

Why do you want to join this program? *

I like the chance to learn more about a topic that has a big impact on how we live our daily lives. With a background in statistics and mathematics. I was aware that there was something more I wanted to do, like construct anything in context to Ghana or Africa. I then reflected on my coursework, what I had learned so far with, and which course I enjoyed the most. It was unquestionably "machine learning, model-related courses(Learn algebra, Logistic Regression) , and statistical computing." I am still a junior, but I have less than three years of experience thanks to self-taught methods like watching YouTube videos and taking online classes. However, because I lack experience, it is difficult for me to find data science projects to work on. I've been working on web development projects for the first two-thirds of the year and participating in the Zindi competition to hone my talents. I've produced a variety of demos for myself in that regard.

If you get selected, will you be able to dedicate 2 months to the program? *

⦿ Yes

◯ No

What is your experience in Machine Learning or pertaining fields ? *

Thou I am still a junior, but I have less than three years of experience thanks to self-taught methods like watching YouTube videos and taking online classes. However, because I lack experience, it is difficult for me to find data science projects to work on. I've been working on web development projects for the first two-thirds of the year and participating in the Zindi competition to hone my talents. I've produced a variety of demos for myself in that regard which you can find on my Github Account.

Describe your communication and team building skills in 30 words or less *

An effective team player that can handle numerous challenging situations, has great critical thinking skills, and is fluent in English.

What are your expected returns from the program? *

☑ Job Opportunities

☑ Networking

☑ Portfolio Building

☑ Skillset Improvement

☐ Research

Project Choices/Skillsets *

- ☑ Computer Vision
- ☑ NLP
- ☑ Machine Learning
- ☐ Deep Learning
- ☐ Tensorflow
- ☐ Pytorch
- ☐ Federated Learning

Rate Your Programming Skills *

	○	○	○	○	◉	○

Attach a project which you are proud of, in the relevant field.(GitHub repo link of that project) *

https://github.com/Bonniface/Artisanal-Mining

At the TMLC Fellowship program, industry experts will be dedicating their quality time to mentor the batch. What experience and developments would you present during the program to make this collaboration productive? *

I can affirm that, I genuinely excel at data wrangling, modeling, and project evaluation with deep understanding in R and Python on my own. In actuality, I love to investigate and learn new theories for every project, even though it is exhausting and highly stressful, since I want to help and demonstrate what I can also offer to make this collaboration productive.
